

~~SECRET~~/NOFORN - HANDLE VIA SKEET CHANNELS ONLY

PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8815

SESSION NUMBER: 2

DATE OF SESSION: 23 SEP 88

DATE OF REPORT: 29 SEP 88

START: 1020

END: 1115

METHODOLOGY: CRV

VIEWER IDENTIFIER: 095

1. (S/NF/SK) MISSION: Identify and describe "Object B", including its origin and mission.
2. (S/NF/SK) VIEWER TASKING: Stage 1 coordinates; later [mission] and [production facility].
3. (S/NF/SK) COMMENTS: None.
4. (S/NF/SK) EVALUATION: [3] *1*

SGFOIA3

Reference Para 4 d, of tasker f:

(e), "Determine in fact, Target "B" did fulfill its intended mission. How (activity) was this accomplished/ was accomplished.?"

~~SECRET~~/NOFORN - SKEET CHANNELS ONLY

CLASSIFIED BY: DIA-DT
DECLASSIFY : OADR

CRV

Start: 1020

End: ~~1115~~ 1115

Site is a large, low, circular (30-50 m in diameter), rounded, heavy, sealed structure on flat, open, sparse, rocky uneven ground (see sketches pages 6a and 6b). The structure is full of machinery.

The origin of the structure is a different location. At the location of origin the structure was supported on a flat slab in an area which was defined by its purpose. The structure's supports were rectangular and thin (see sketch page 11). Dark haired people, wearing uniform work clothing, were conducting maintenance on the structure.

The mission of the structure involves motion, flight and penetration. Timing and angles are important for successful mission accomplishment. The purpose of the mission is the reordering of priorities. Associated with 'reordering of priorities' are the concepts: lists, sequences, routine, classification and priority.

The structure is produced in a large open building 'like' a bay. Molds are somehow involved. The process of production produces noises such as clanking, hissing, thumping, generator sounds and grinding. Great care is taken to insure that the outside surface of the structure is almost perfectly smooth. The machining of the structure is a rather basic/primitive process when considered in light of the product.

Outside the production building the land is flat with lots of green and brown colors. There are other large structures in addition to the production building. The air is warm.
